

Integration - Cloudbreak Health

Connecting patients and providers anywhere, anytime, in any language, on any device

Cloudbreak Health Integrates with Your Current EHR and Telehealth Solutions

The way we connect and care has changed rapidly, but change has also brought new opportunities to overcome disparities and ensure equity in care with telehealth. Our new normal includes video remote interpreting (VRI) and high-definition video with multi-party calling. Telehealth can put the full care continuum at your fingertips, and no one does it like Cloudbreak. Whether you're adding an interpreter to a telehealth session via your telehealth investment or adding in-hospital telehealth capabilities to your existing Martti devices – Cloudbreak has you covered.

Cloudbreak Health

Cloudbreak Health revolutionized patient and provider communication by introducing video remote interpreting (VRI), establishing Cloudbreak as a pioneer in telehealth technology. We develop platforms that restore the joy in our healthcare clients' work by allowing them to focus on people instead of technology. Our technology is easy to use, reliable, and scalable with one simple goal: connecting people. Communication between patient and provider has been shown to positively influence health outcomes and patient satisfaction. With Cloudbreak's unified telehealth solutions you can always access a certified medical interpreter. Cloudbreak is committed to our mission of bridging healthcare disparities and to that end we have implemented a number of integrations with partner solutions to enable as much healthcare equity as possible.

With Cloudbreak Health, you can:

- Add in-hospital telehealth capabilities to your current Cloudbreak/Martti devices
- Expand access to medically trained interpreters across your health system and telehealth sessions

Cloudbreak Health Integration

Cloudbreak Health has established a unified, nationwide Telehealth architecture that integrates various core platform technologies, including Cloudbreak Telehealth Platform, and MARTTI (My Accessible Real-Time Trusted Interpreter)—providing a framework to integrate with most health systems EHRs, Telehealth, Video and Patient Experience investments.

The Cloudbreak Telehealth Platform is a modularly configurable software engine that supports video and audio communications. The Platform is available via Cloudbreak web and application offering as well as through integrations and interoperability with other solutions used in healthcare like Epic, Zoom, Amwell, and rising industry star Caregility. From Telequarantine, Telepsychiatry, Telestroke, and other specialties, to integrated language services for limited English proficient and Deaf/hard-of-hearing patients, Cloudbreak’s innovative, secure platform overcomes both distance and language barriers to improve patient care, satisfaction, and outcomes.

Cloudbreak’s platform is one of the most widely utilized Telehealth networks in the country, delivering over 85,000 encounters per month via more than 10,000 video endpoints at over 1,200 hospitals nationwide.

Add medically qualified interpreters at the touch of a button

Now you can integrate Martti’s critical language services across your entire health system so that you can access interpreters with the touch of a button.

With access to our certified medical interpreters in more than 250 languages – offering nearly 60 of those in video – providers can connect with and treat all patients with the same superior quality care by bridging language barriers. Martti provides immediate, reliable, secure, and compliant language services for patients who are limited English proficient, Deaf, or hard of hearing. Our dedicated team of qualified video interpreters are available 24/7.

And with seamless integrations with dozens of platforms, EHRs, and telehealth solutions, Martti is everywhere you need it to be.

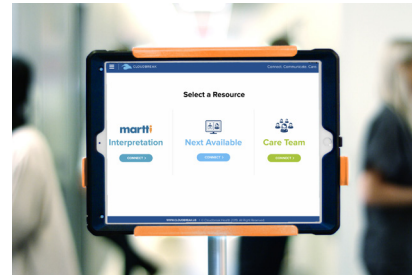

Expand the capabilities of your Cloudbreak/Martti devices

Telehealth has become a necessity for safe and comprehensive care. Increase your impact by expanding the functionality of your Cloudbreak/Martti devices with Cloudbreak Telehealth. Our comprehensive telehealth allows you to place and answer video calls, care for patients, converse with your team, and connect with a qualified interpreter – all from your Cloudbreak/Martti device.

With Cloudbreak Telehealth, you can easily distribute resources, reduce exposure risk, and save critical PPE. Our integrated video solution protects staff, patients, and visitors while enhancing human connection. Available on iPhone, iPad, and browser, Cloudbreak Telehealth solutions make sure you can connect with, communicate with, and care for your patients no matter the barrier. Cloudbreak’s telehealth solutions are available both in the app store and via web browser. Specialists and other care team members can easily connect with Cloudbreak/Martti devices over any distance using their own devices. Our sleek and simple technology is even effortless for family members and guests to use, making it easy to include loved ones in patient consultations. Cloudbreak’s telehealth solutions add functionality and expand your impact without the need to add new systems and equipment.
